SUMMARY

Data Analyst and Data Science trainee with hands-on experience in SQL, Python, Power BI and machine learning fundamentals. Skilled at turning raw data into clear, actionable business insights through analysis, visualization and dashboarding. Seeking an entry-level Data Analyst / Data Science role.

EDUCATION

Qualification	Institute / University	Year	Score
B.Tech (AI & Data Science)	VDCET, D-BATU	2026	7.25 CGPA
Diploma (Computer Science)	VAPM Polytechnic, Maharashtra State Board	2022	69.89%
SSC (Class X)	VVW, Maharashtra State Board	2019	80%

SKILLS

Programming	Python, SQL
Data Analysis	SQL, Excel (Pivot Tables, VLOOKUP), Python (Pandas, NumPy)
Machine Learning	Machine Learning, Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation
Python Libraries	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
Deep Learning	TensorFlow / PyTorch (basics), Neural Networks, NLP fundamentals
Visualization	Power BI, Matplotlib, Seaborn
Core Concepts	Statistics & Probability, Data Cleaning, EDA, Dashboarding
Tools	Oracle SQL, Google Sheets, Jupyter Notebook, Git/GitHub, VS Code

PROJECTS

Chocolate Sales Dashboard (SQL, Power BI, Excel) Jun – Jul 2026

- Analyzed a 1,094-row chocolate sales dataset spanning 6 countries, 22 products, and 25 sales reps ($6.18M in total revenue) to identify regional and product-level revenue trends.
- Built an interactive Power BI dashboard tracking revenue, boxes shipped, and top-performing products/regions, cutting report turnaround from ~3 hours (manual) to 2–3 minutes (~98% faster).
- Used SQL and Excel (Pivot Tables) to clean and structure the dataset for accurate, repeatable reporting.

QR-Based Student Attendance System (Python, Pandas) Jan – Mar 2026

- Built a QR-code-based attendance system for a class of 19 students, replacing manual roll call with a scan-and-log workflow.
- Used Python and Pandas to generate, scan, and log QR-code check-ins into structured attendance records.

EXPERIENCE

Data Science Intern — CodSoft Apr 2025 – May 2025

- Worked on real-world data science projects covering data analysis, machine learning, and data visualization.
- Applied Python-based analytics and model-building techniques, bridging academic learning with practical, hands-on application.
- Practiced storytelling with data to communicate findings clearly.

Python Programming Intern — InternPe Apr 2025 – May 2025

- Built a strong foundation in core Python: data types, control structures, functions, and object-oriented programming.
- Developed mini-projects and scripts to automate tasks and solve real-world problems.
- Gained hands-on experience with NumPy, Pandas, and Matplotlib for data handling and visualization.
- Collaborated with peers and mentors in a virtual environment, strengthening teamwork and communication skills.
- Completed assignments and coding challenges that sharpened problem-solving and coding proficiency.
